Custom Bible cover with onyourgates.com.

The **yellow area** is the spine. You can have your background or picture stretch across the spine, but it is TOO SMALL for any text.

The **pink area** is the bleed. Make your background go all the way to the outer edge of the pink area. Do not place logos, text, or important items in the pink area.

The **white area** is for text. Keep all your text within this box.

The **pink/purple line** is the trim line. This is where your cover will be cut.

These guides will NOT print on the final product. Create your desired cover overtop these guides.

Send your completed document to **steve@onyourgates.com**. If you have any questions, please let us know. We'd be happy to help!
